## IDEAS FOR SELF GUIDED TOUR

### THE DUOMO: A SYMBOL FOR THE CITY

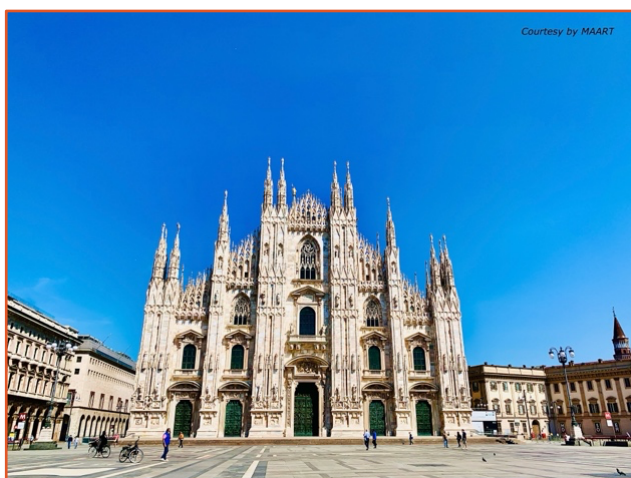

A journey of more than 600 years, among historical curiosities and legends.

From the **Visconti origins** to the **Gothic interiors**; from the magnificent stained-glass windows, around which legend has it that the famous Milanese risotto was born, to the early Christian and Roman remains that tell us of when Milan was the capital of the Western Roman Empire.

**The Duomo**, dedicated to Maria Nascente, is more than a church, it is the symbol and pride of the Milanese.

And its terraces, from which you can admire the **city's renewed skyline from 360 degrees**, are splendid, breathtaking. You will approach the sky, observing the dense embroidery of rampant arches, pinnacles spires and statues that offer an astonishing spectacle. You will see the famous '**Madonnina**' from close up, which is still unsurpassed in height - so the city's master plan dictates!
